

GGGS Newsletter N.3 – 24.09 2025

GGGS at Intergeo 2025 – Frankfurt

We are pleased to announce that **GGGS will be exhibiting at Intergeo 2025** – the world's leading event for geospatial innovation.

Hall 12.0 / Booth F.101

October 7–9, 2025 | Frankfurt am Main, Germany

Join us and explore our latest solutions for **aerial mapping, oblique imaging, and intelligent monitoring**.

What We Will Showcase

- **SAM – System for Aerial Mapping**
Our proven **SAM systems** deliver **high-precision aerial mapping**, combining flexibility with state-of-the-art sensor integration for professional data acquisition.
- **OIS – Oblique Imaging Systems**
We will present our advanced **oblique imaging systems**, designed to capture cities and landscapes from every angle with maximum efficiency.
- **Tailored Solutions**
From **specialized installations** to **customer-specific integrations**, GGS offers solutions that adapt to the most demanding geospatial projects.

What's New in 2025

- ◆ **Fireguard.360** – An intelligent wildfire detection system for **early warning and real-time monitoring**.
- ◆ **OIS.MM** – The optimized oblique imaging solution for **helicopter-based missions**.
- ◆ **OIS.360** – Our **brand-new system** that enables **oblique imaging with only just one camera** – simple, efficient, and powerful.

At Intergeo 2025, GGS will showcase innovations that push the boundaries of **aerial imaging and smart monitoring**. Visit us to see how our technology helps create **faster, more accurate, and more reliable geospatial data**.
